

# CASA NOVA

Design, Customised to Your Requirements

Your continuing satisfaction is our prime concern here at Biohort.

#### **Dear Customer!**

Biohort products offer you the best quality, functionality and security. Our customers especially appreciate the durability and low maintenance of our storage solutions.

Biohort garden sheds have proven their durability in over 30 years of outdoor service. We are an Austrian manufacturing company with highly-trained and skilled workers. Biohort uses only top-quality materials from tested suppliers to manufacture its products. The high-quality steel plate we use is supplied by the same worldwide renowned Austrian and German steelworks in which German premium car manufacturers place their trust. This is the reason why we can offer our customers a 20-year guarantee against corrosion with a clear conscience.

Sophisticated design and the high Austrian quality standard applied in the manufacturing process creates products that you will enjoy for decades.

We personally vouch for this.

Dr Josef Priglinger Managing Director Dipl.-Ing. Maximilian Priglinger Managing Director

# The Biohort All-round Carefree Package

#### **Product Configurator**

The Biohort 3D configurator visualises every product with just a few clicks - including any chosen accessory - and provides you with a price right away. And this is not all: the handy augmented reality function allows you to virtually position the product directly in your garden via smart phone or tablet.

www.biohort.com/configurator

#### **Advisory Service**

To make sure your project works out smoothly, our experts will assist you every step of the way. E-mail enquiries via casanova@biohort.at or via phone +43 7282 7788 0.

#### **Assembly Service**

Our well illustrated assembly manual allows for self-assembly. Upon request, our specialised assembly partners are available to install your CasaNova® accordingly.

www.biohort.com/assembly-service

#### **Foundation Information**

Storm resistant, secure anchorage, and protection against of water ingress are important criteria that should be considered when deciding on the type of foundation. Our foundation tips can help you further. More information on page 15 and at

www.biohort.com/ foundation-tips-casanova

## Design, Customised to Your Requirements

Whether as a garden shed, workshop or sauna - the insulated design outbuilding CasaNova® provides unique flexibility with a wide range of equipment options and adapts exactly to your ideas.

No matter if you are looking for functional storage and place to store your plants during winter or if you want to establish an oasis of peace in your garden: with the CasaNova® you can make your wish come true at a unique quality level.

#### **Individually Plannable**

Through the innovative CasaNova® with its modular construction, Biohort combines a rather free choice during planning with the advantages of a prefabricated solution. The insulated exterior walls allows for the CasaNova® to be used even on cooler days.

#### **Comfortable Implementation**

With its own development and production in Neufelden/Austria, Biohort is able to support the realisation of your garden dream with comprehensive services: Your personal adviser will help you with the planning, advise you on the appropriate foundation and will be happy to arrange a certified installation team if you do not wish to install your CasaNova® yourself.

#### **Absolutely Maintenance Free**

Unlike the owners of wooden sheds, you can forgo the need to regularly retouch and paint your property! This is all thanks to the metal construction of CasaNova®. Made completely out of hot-dipped galvanised high quality sheet steel which ensures outstanding durability and makes it maintenance free.

#### **Perfect Metal Design**

With its harmonious contours and appearance, the CasaNova® impresses from afar. On closer inspection, the beautiful surface surprises with a pleasantly warm feel thanks to high-quality polyamide enamel. It is this perfect combination of form and finish that makes it a functional design element.

# **Individually** Plannable

The CasaNova® is an eye-catcher in every location: Smooth surfaces without visible screws and soft contours ensure an incomparably elegant appearance. With nine sizes and two colours, it is suitable for every location.

Thanks to the **modular design**, there are no limits to your wishes. Doors and windows can be positioned freely according to your expectations. So your dream of your garden outbuilding becomes reality!

#### **Colours**

Metallic Dark Grey

Biohort Online Product Configurator with AR function.

#### **Sizes** (in cm, outer dimensions incl. roof overhang)

**Door Opening:** Standard Door (right door hinge): 90 x 198 cm (W x H) Double Door: 187 x 198 cm (W x H) The dotted lines mark the roof overhang.

CasaNova® 3x5, Metallic Dark Grey (with glass element)

CasaNova® 3x3, Metallic Dark Grey (with double door, aluminium floor frame and 2 glass elements)

CasaNova® 3x4, Metallic Quartz Grey (with aluminium floor frame, double glass door and tilt and turn window)

CasaNova® 3x5, Metallic Dark Grey (with overhead sectional garage door, additional door and tilt and turn window)

## Focus

## on Perfection

We owe the excellent reputation of our products to superior design, convincing quality and uncompromising service. Based on this high level and our technical production know-how, we have further exploited our potential and developed CasaNova®: an outbuilding that offers the necessary freedom for individual design with functional wall elements and a flexible plug-in system.

#### **Deliberate Specialisation**

From the very beginning Biohort has concentrated on storage space solutions made of high-quality 0.5 mm sheet steel, thus building up superior production know-how. A separate production line with predominantly manual production was set up at Biohort especially for the customised production of CasaNova®.

#### **Highly Motivated**

Our dynamically structured production process makes it possible to achieve delivery times of 4 to 6 weeks. The delivery is carried out by a truck with unloading possibilities, the self-assembly of the complex house is feasible for two persons in about one day thanks to the clearly illustrated assembly instructions. A labour

saving alternative is to make an appointment with a specialized assembly service team.

#### **Perfect Delivery**

During the packaging, the assembly packages are put together according to the desired design and all components are checked thoroughly before dispatch. The custom-made transport boxes guarantee damage-free delivery for a smooth, undelayed assembly of your CasaNova®.

# Small Details with **Great Added Value**

Our technicians are constantly striving to improve the gardening experience of our customers. The result of our work are the numerous details that are easily overlooked at first glance. We guarantee you however, that you will not want to go without them during your lifetime as a CasaNova® owner!

## Continuous Wall and Door Insulation

The individual wall elements are fitted with a tongue and groove joint on the long sides. This guarantees absolute protection from ingress of wind and rain. Furthermore the adhesive sealing strip along the complete length of the tongue prevents the creation of a thermal bridge between the wall elements. These achieve a U-value of 0.76W/m²K (insulation value of a 35 cm hollow brick) due to the precisely cut EPS W2O core of expanded polystyrene rigid foam. If you are planning to add heating, we recommend fitting XPS Styrofoam panels available from any DIY centre under the roof and the double-glazed skylights.

#### **High Level of Security**

Outbuildings are often the target of unwelcome guests. It was therefore not enough for the Biohort developers to construct a stable door. They have therefore equipped them with a high-quality stainless steel door handle set with a fully functional standard cylinder lock. This last feature is

approved by insurance companies. The height of the skylights is also a security feature, as it prevents curious glances into the interior without having to do without light.

#### **Multifunctional Roof Structure**

The roof is constructed of plywood panels, which are laid and fixed to the roof beams. The wooden ceiling visible on the inside regulates the air humidity thanks to its hygroscopic properties. On the outside, the wooden roof is efficiently protected by a full-surface, high-quality EPDM roofing membrane. The stability of the panels and the root-resistant membrane allow for roof greening without hesitation (roof load to 215 kg/m²). Two watertight drains guarantee the drainage of rainwater from the roof.

#### **Comfortable Features**

Many other details guarantee long lasting pleasure with the CasaNova®: The high-quality gas spring from a certified supplier in the automotive industry dampens the door movement. For pleasant ventilation, the acrylic glass skylight in the standard version can be opened on two sides. And the almost flush fitted threshold allows you to move all types of garden equipment in and out of CasaNova®, smoothly and effortlessly.

# **Intelligent** Elements

The modular wall elements make individual customisation of each outbuilding easy and allow you to adapt the function to match your own personal requirements and equip it accordingly. And with the elegant exterior lighting you can impressively present your CasaNova®.

#### **Additional Door**

This practical side door can be fitted into any wall of the CasaNova®. The wall element is supplied complete with stainless steel door handle, standard cylinder lock, gas spring and floor threshold. You can select the hinge position (left or right side) to suit your requirements.

#### **Double Door**

With the help of a second door, a 187 cm wide opening can be created. This makes entering and leaving the shed with large tools and equipment easier. Due to the 3-way locking mechanism, the second door not only stands for comfort but also for security.

#### **Double Glazing**

The double-glazing of the all-around acrylic skylight helps to improve the insulation even further (Attention: ventilation function not applicable!).

#### **Full Length Glass Element**

It brings more light and cosiness. The wall elements with an insulated glass area of 83 x 181 cm (W x H) can also be positioned next to one another depending on wall length.

#### **Tilt and Turn Window**

The prefabricated wall element comes equipped with a high quality aluminium window unit, fitted with double-glazing (frame size: 83 x 65 cm) and will increase the illumination and ventilation of your outbuilding.

#### **Glass Insert for Door**

Doors made of insulated glass make your CasaNova® look particularly inviting and flood it with daylight. So you can enjoy the idyll of the garden optimally from the inside. Also available as a double door.

#### **External Lighting**

Optional outdoor lighting can be prepared to create an atmospheric setting: the milled openings (Ø 6.8 cm) can be positioned on all sides under the eaves and allow two to six lights (depending on building size) to be fitted. Please note: Spotlights are not included in the scope of delivery.

#### **Aluminium Floor Frame**

Increased stability without a concrete foundation - the floor frame provides the essential conditions for installation on a level gravel base with compacted subsoil or on a concrete point foundation. The aluminium floor frame is a prerequisite for fitting aluminium floor panels.

#### **Sectional Overhead Door**

The door is intended for installation on the front or rear wall instead of the standard door. Opening: 236 x 200 cm (W x H). It is available for all CasaNova® models except 3 x 2 m and 4 x 2 m. The 42 mm thick slats offer exceptional strength and insulation. An electric opener with remote control is optionally available (not for CasaNova® 3 x 3 m).

# **Interior Fittings,** to Fulfil Your Wishes

The CasaNova® offers a variety of uses thanks to insulation and free planning with clever window and door elements. The diversity of the Biohort accessory range increases the possibilities – from practical storage solutions to our complete sauna package.

#### Sauna Module

With the Biohort Thermarium available in a pentagonal design, you can fulfil the dream of owning your own sauna. With a surface area of 200 x 200 cm (interior dimensions: 180 x 180 cm), it will comfortably accommodate two people. The 6 kW sauna heater provides the necessary heat, which is infinitely variable via a userfriendly control unit. Scandinavian spruce guarantees the original Finnish sauna character. The Thermarium is fully equipped with corner lights, comfortable loungers, an hourglass, thermometer and complete infusion package. So you can immediately enjoy the pleasure of your own sauna!

#### **Hook Set**

The set, consisting of a combination hook, handle hook and shovel hook, is hung on the wall between two supports rails.

#### **Shelf System**

The support rails are fitted directly onto the aluminium roof supports. The shelves (depth: 24.5 or 43 cm) can be hung at any height.

#### **Folding Table**

Quickly provides you with a solid working area with a size of  $96 \times 57.5$  cm (L  $\times$  W). Simply slot into two shelf support rails and fold away when not required.

#### **Aluminium Floor Panels**

Quick and easy to install, high-quality and stable. The aluminium chequer floor panels consists of several panels and connecting rails. To ensure the optimal fitting the aluminium floor frame is necessary.

#### **Electric Mounting Panel**

Discreet, hidden cable routing and easy assembly of switches and sockets (electrical equipment in photo not included). Available also in the same colour as the interior of the outbuilding at an extra cost.

#### **Roof Support in Grey White**

The roof supports in the wall's interior colour make your CasaNova® look even more elegant, which is particularly useful when used for purposes other than pure storage. The interior immediately appears more inviting and comfortable.

#### Bike Hanger "BikeMax"

The hanger is simple and convenient to install, height adjustable in 11 different positions and designed for bicycles of all sizes. An integrated loop for a padlock is included with each "BikeMax".

# Have You Thought **About the Foundation?**

More Information: biohort.com/foundation

A foundation must be carefully planned and built. A professional should determine the appropriate foundation with the necessary depth, width and the type and position of reinforcement required for the particular type of soil. A foundation allows the CasaNova® to be fastened to it securely against storms, offers torsional freedom and protection against water ingress.

#### 1) Concrete Foundation

The most durable and proven method is a concrete foundation, which is especially necessary for a loose soil type. This flat base enables quick and uncomplicated assembly. On these you can mount the CasaNova® storm-proof. Screws and plastic anchors are included in the standard delivery. The concrete foundation should be only slightly larger than the surface area itself, about 2 cm per side.

### a) Concrete Foundation - floor frame necessary (sauna solution with tiled floor)

#### b) Step Foundation - no floor frame necessary

#### 2) Point and Strip Foundations

Further possibilities, which however are only possible on dense and set load-bearing soil, are the strip and point foundations. Minimum depth 80 cm and minimum width 30 cm.

a) Strip Foundation: These footings, which follow the course of the side walls, offer the possibility of storm-proof fastening of the CasaNova® with the aluminium floor frame.

b) Point Foundation: Certainly more complex, but also possible. Attachment is the same as with the strip foundation.

**Garden Sheds** Rely on Quality & Longevity

**Outdoor Boxes** Outdoor Boxes for the Garden, Patio & etc.

**Bicycle Storage**Bicycles, Scooter & etc Safely Stowed

**Dustbin Storage** Stylish, Practical & Maintenance Free

**Gardening Helpers** Garden Design at its Best
